

stainless steel high pressure filters

FEATURES

- comprehensive range of stainless steel filters ideal for a wide variety of high pressure applications
- manufactured from high grade 316 stainless steel
- 21 models across 3 pressure ranges offering flows up to 2000 scfm and pressure ratings up to 5000 psig
- choose from 5 different element grades including 25, 5, 1 and 0.01 micron coalescing and/or dust filtration and activated carbon plus a water separator option
- the 725 psig range incorporates an innovative push-fit element design to ensure optimum sealing and mechanical strength
- the 1450 and 5000 psig ranges incorporate elements with corrosion resistant stainless steel end caps
- custom engineered filter media designed to provide low air velocity preventing oil carry over for high efficiency filtration with minimal pressure drop
- manufactured in an ISO 9001 approved facility and tested in accordance with ISO 8573.1:2010
- applications include chemical, food and beverage, manufacturing, military, oil and gas and pharmaceuticals

condensate drain options

select from stainless steel manual drains or stainless steel timed solenoid drains to suit your requirement

element design

725 psig range element end caps are color coded for easy identification; 1450 and 5000 psig ends caps are stainless steel
