100-240 VAC/50 or 60 Hz - 41 scfm desiccant air dryer

The nano D^2 modular air dryer provides clean dry air for a wide range of industrial applications. These dryers use the pressure swing adsorption principle in a modular design to dehydrate and purify your compressed air in a simple, efficient and compact package. With digital PLC controls that manage energy consumption and provide dew point monitoring, the D^2 modular desiccant air dryer provides substantial energy savings under various seasonal conditions for critical applications.
