

460VAC/60Hz -1400 scfm desiccant air dryer

The nano aircel brand twin tower blower purge desiccant air dryer provides clean dry air for a wide range of industrial applications. These dryers use a blower and an external heater to provide heated ambient air for regeneration. With purge air usage less than 2% (averaged over cycle) and a zero purge option, these dryers offer the lowest cost of operation for most applications.

⁽²⁾ based on a timed cycle at full flow

⁽³⁾ vessels by customer

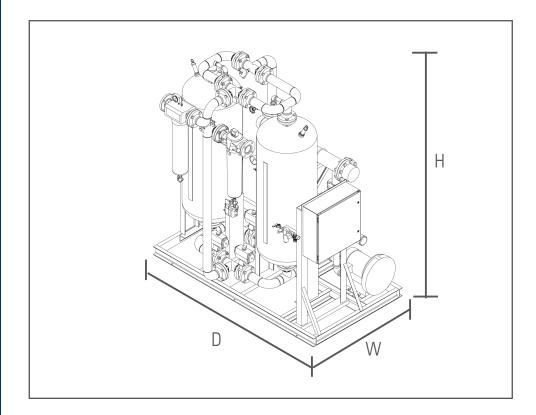

⁽⁴⁾ specifications subject to change without notice

technical specification

dimensions & weight		
width (in)	70	
depth (in)	105	
height (in)	106	
weight* (lbs)	6800	

^{*}desiccant is included in total weight. Units 2500 scfm and above desiccant is shipped loose

features

- made in the USA
- rugged steel frame
- UL/cUL compliant
- ASME U-stamped pressure vessels
- dew point control
- pre and after filters included as standard
- Allen-Bradley PLC controller
- NEMA 4
