# **DXR 1250 NA**

460/3/60 - 1250 scfm refrigerated air dryer

The nano R<sup>4</sup> direct expansion refrigerated air dryer offers a reliable, cost effective and simple solution to those who need quality dry compressed air for their manufacturing processes. To avoid condensation, and therefore all chance of equipment and end-product corrosion or damage, compressed air needs to be dry — exactly what our range of R<sup>4</sup> dryers is designed to do.

rated capacity (scfm) (1) absorbed power (kW) 6.7 full load amps (A) 11.5 power supply (V/Ph/Hz) 460/3/60 pressure drop over dryer (psid) 4.2  operating limits design operating pressure range (psig) 60 to 203 maximum refrigerant working pressure (psig) 623.5 minimum/maximum ambient temperature (°F) 41 to 114.8 maximum inlet temperature (°F) 140 refrigerant gas/circuit refrigerant type R410A refrigerant charge per circuit (lbs) 7.5  compressors compressor type scroll compressor quantity 1 independent gas circuit 1 fans fan type axial

<sup>(1)</sup> rated flow capacity: conditions for rating dryers are in accordance with ISO 7183 (Option A2). Compressed air at dryer inlet: 100 psig (7 bar) and 100°F (38°C); ambient air temperature: 100°F (38°C); operating on 60Hz power supply. For all other conditions, contact support@n-psi.com

## scope of supply

### mechanical components

- •combined air-to-air and air-to-refrigerant heat exchanger design
- •zero air loss condensate drain
- integrated water separator
- single electrical connection
- rotary compressor
- hot gas bypass valve
- •fully insulated heat exchanger

nano-purification solutions Charlotte, North Carolina United States

nano-purification solutions TN Maryville, Tennessee United States

nano-purification solutions Canada St. Catharines, Ontario Canada

nano-purification solutions Ltd. Gateshead, Tyne and Wear United Kingdom

nano-purification solutions GmbH Erkelenz, Germany

nano-purification solutions Asia Singapore

tel: 704.897.2182 fax: 704.897.2183 email: support@n-psi.com web: www.n-psi.com

# O X (1)

### controls and monitoring

- user friendly interface
- digital pressure dew point display
- includes service warnings and reminders
- remote alarm contact
- automatic power on after restart
- provides controls for all system components
