### NDX 0020

### 115/1/60 - 20 scfm refrigerated air dryer

nano R4 refrigerated air dryers are designed for reliability, performance and low cost of ownership. They feature a low pressure drop stainless steel heat exchanger, stainless steel moisture separator, environmentally friendly refrigerants, TXV for precise control and a simple yet powerful electronic controller. The R4 offers piece of mind that downstream equipment will be protected from damaging moisture contamination.

| general characteristics                     |          |  |
|---|----------|--|
| rated capacity (scfm)*                      | 20       |  |
| absorbed power (kW)                         | 0.23     |  |
| full load amps (A)                          | 3.80     |  |
| power supply (V/Ph/Hz)                      | 115/1/60 |  |
| operating limits                            |          |  |
| design operating pressure range (psig)      | 0 - 232  |  |
| maximum refrigerant working pressure (psig) | 247      |  |
| minimum/maximum ambient temperature (°F)    | 34 - 122 |  |
| maximum inlet temperature (°F)              | 158      |  |
| refrigerant gas/circuit                     |          |  |
| refrigerant type                            | R134a    |  |
| refrigerant charge per circuit (lbs)        | 0.51     |  |
| compressors                                 |          |  |
| compressor type                             | piston   |  |
| compressor quantity                         | 1        |  |
| independent gas circuit                     | 1        |  |
| fans  |          |  |
| fan type                                    | axial    |  |
| fan quantity                                | 1        |  |
| air circuit                                 |          |  |
| air circuit connections (NPT)               | 1/2"     |  |
| ISO class                                   |          |  |
| ISO air quality class (water content)       | class 4  |  |
|   |          |  |

\*rated flow capacity: conditions for rating dryers are in accordance with ISO7183 (Option A2). Compressed air at dryer inlet: 100 psig (7 bar) and 100°F (38°C); ambient air temperature: 100°F (38°C); operating on 60Hz power supply. For all other conditions, contact support@n-psi.com

#### features

- stainless steel heat exchanger for maximum durability and corrosion resistance
- CAREL advanced electronic controller
- oversized condenser for high ambient temperatures
- robust refrigeration circuit with fan pressure, high refrigerant pressure and low suction pressure switches
- environmentally friendly R134a and R407C refrigerant
- supplied with 6' power cord for plug and play operation

#### advanced microprocessor features

- 3 button digital interface
- dew point display for visual monitoring
- user programmable operating parameters
- status indication for drain, fan and compressor
- drain test and adjustment
- Experience. Customer. Service.

- timed solenoid drain for reliable condensate removal
- refrigerant gauge for simple diagnostics
- powder coated aluminum panels TXV ensures stable dew point
- performance under varying loads
- stainless steel inlet and outlet connections
- c-UL listed components
- built in reliability with a 2 year warranty with pre-filtration and non-corrosive piping installed
